

Management of Violence & Aggression directives

Request

I am looking at introducing a Prevention and Management of Violence and Aggression Advance Directive into the care plans, whereby we discuss with patients that have histories of aggression ways in which their aggression can be best managed. I was wondering whether similar directives are used within your services, and if so whether you could send me some information.

Our Response

We are please to attach the following information in response to your request:

- Management of Actual or Potential Aggression Policy
- Care Programme Approach (CPA) Policy
- Information on making an Advance Statement
- Advance Statement form
