

Race and Gender of top three tier of staffing

Request

We are an organisation promoting the voice of Hindus in Leicester and Leicestershire and are keen to secure information from you on the race and gender makeup of your top three tier of staffing

Our Response

Thank you for your request for information under the Freedom of Information Act 2000, which we received on 23 January 2010 and which you clarified for us on 27 January, relating to the race and gender make-up of our senior managers. We should like to confirm the figures do not include medics, senior clinicians or non-executive members. The figures are presented in the following format in an effort to be helpful and provide information that might otherwise be exempt under Section 41, as this information is provided to the Trust in confidence and individuals might be identifiable due to the small numbers involved, when put together with other information:

Ethnic Origin	Grand Total
White - British / Irish / Other	126
Asian - Asian British / Indian / Pakistani / Other	9
Other	7
Grand Total	142

Female	Male	Grand Total
81	61	142

In an effort to be helpful, particularly in view of the need to clarify your original request, I thought it might be useful to include further statistical information regarding our percentage ratio of Trust Workforce to the Population of Leicester and Leicestershire and the Trust Workforce to our Service Users as at January 2011; please see the attached spreadsheet.
